2022 BOOTCAMP EVALUATION

JUNGHO LEE

STATISTICS FOR RESEARCH

Feedback for JungHo Lee was universally positive. Two students mentioned JungHo's lecturing and presentation style as being a strength, making it easy for students to follow along, especially for p-hacking and Bayesian statistics. One student mentioned the need to decrease the amount of presentation material, increasing time for exercises and questions.

**"JUNGHO DID VERY WELL!
VERY UNDERSTANDABLE AND EASY TO FOLLOW ALONG,
ESPECIALLY FOR THE P-HACKING SESSION."**

INSTRUCTOR FEEDBACK – please share any positive or constructive feedback

- Good lecturer, I like the presentation with annotations style.
- Less material, more time for exercise and questions; more explanation on variables/ parameters would be helpful.

- No notes, JungHo did very well! The Bayesian stuff was too far outside my knowledge to understand what was happening, but I could still follow along with his code which was nice.
